New Option in Pallet Racking System Protection Announced by Sentry Protection Products

Rack Sentry Cutout is now available in 4-in. (100 mm) width, making it newly possible to protect both the uprights and low horizontal beams of commonly used pallet racking systems. The 4-in. (100 mm) Rack Sentry Cutout features: design to flex and absorb impact of collisions, then resuming original shape; 6-in. (152 mm) cutaways to accommodate horizontal beams of pallet rack systems; easy tool-free installation in seconds using straps with hook and loop attachments; direct attachment to rack uprights preventing the collision damage to floors that otherwise result with floor-attached steel protectors.
